

**PRECAUTION:** Wear gloves, boots and respirator, wash hands and skin after use of the insecticide.

**Dosage:** Indoor Residual Spray  
Dilute 40-60ml of RUBI 10 SC in 8 litres of water to a cover 200 square metre area for adult mosquitoes.

RUBI 10 SC should be applied thoroughly in all surfaces covering dark corners, cracks and crevices of the houses where mosquitoes rest. It should be sprayed using any WHO approved compression sprayers.

**Dosage:** Bed-net impregnation & Re-impregnation  
Step I: Dilute 6ml of RUBI 10 SC in 2 litres of water to cover a net which is 15 square metre in a wide palastic basin.  
Step II: During impregnation normal precautions should be followed. Dip the net in the solution until it is soaked. The solution should be applied thoroughly and evenly to the net by repeated rubbing and squeezing.  
Step III: Do not hang impregnated net for drying to avoid dripping. Impregnated nets should be spread on a plastic sheet for initial drying in order to avoid dripping and then to hung shade for further drying.

**Use of treated bed nets:** RUBI 10 SC treated bed nets after completely drying can be placed over the bed and used normally. Repeated washing of bed net removes the insecticide. Therefore avoid washing. If washing, treat again with RUBI 10 SC.
